*Delivering Excellence*

## AeroAcquisitions

specializes in aircraft sales, PAX-TO-CARGO conversions (STC MOD), leasing (ACMI/PBH), remarketing, refurbishing, engines and parts sales, and related aviation services.

Besides our normal inventory, we have direct/off-market sourcing access to Boeing 737-300, -400,

-500, NEW GEN -700 and -800 aircraft, as well as 767-200, 767-300ER and 757-200's.

These aircraft can be used for passenger service or cargo conversion programs that include full maintenance capabilities, engines, and parts support.

### Our Aviation Services also include:

- Ferry Flights
- Maintenance Services & Slot Scheduling
- Engine Upgrades & Core Services
- Top Case Repairs
- Tear Downs
- Pre-Purchase Services
- VIP Chartering

## CONVERSIONS

*Working To Suit Your Needs*

**Aero**Acquisitions

along with its partner companies have performed 10+ narrow body cargo conversions for clients in the Middle East, Asia, European Union, and South America.

PAX-TO-CARGO conversion is a more cost effective way of adding freighter capacity to your aviation services. A typical conversion/"D" check for a 1995 Boeing 737-400 PAX costs about 50% less than a new cargo aircraft.

Our primary cargo conversion partners are PEMCO, Tampa, FL and AEI Miami, FL. Both are FAA-certified service facilities. We also partner with other certified MRO/CARGO MOD sites conveniently located in other parts of the world.

Although AeroACQ is capable of managing various PAX-TO-CARGO conversions, we specialize in 737-400, -300, NEW GEN -700, -800, 757-200F, 767-200F and 767-300ER-F modifications.
